OSA - 0720-64

0 January 1964

Dear Joe:

Re: Contract EG-400, Tasks IV, V, and VII

Getting together the delivery documentation you requested on the referenced Tasks has taken a little time, but has finally been accomplished. You will note that it is somewhat heterogeneous in character, but, I believe, every item is covered adequately.

A Task by Task, item by item, explanation of the enclosures may aid your understanding.

Task IV

Items 1a and 1b

Three (3) copies of a DD-250, our Shipment Nbr. 64-XD-23, are enclosed. These units were manufactured by us and transferred to our Production Department for use in supplying materials on Contract FP-1500. Although this DD-250 calls out shipment to ourselves, the actual units are now scattered in the supply system.

Item 2c

Three (3) copies of our Shipper Nbr. 62-EG-46 are enclosed. Item 2c, described in the contract as a "Re-spooling machine" is described in this shipper as a "Core Transfer Machine" and is so listed with ten (10) accessory parts. You will note that T. Sgt. Lee [redacted] Supply Section has signed off.

25X1

Item 2d

Three (3) copies of our Shipper Nbr. 62-EG-10 are enclosed. Again, the contract description varies from the shipper description. The contract says "RT-12 Processor." the shipper says "Versamat." [redacted]
[redacted]

- 2-

30 January 1964

Task V

Two (2) each Continuous Printer, Three-in-one.

When these printers were completed the "Niagara" nomenclature had been established. Serial numbers 101 and 103 were fabricated under this task. Both of these were sent to at Suitland, Maryland and are still in use at that shop. Three (3) copies of our Shipper 62-XD-92 for Serial Nbr. 101 and three (3) copies of our Shipper 62-XD-91 for Serial Nbr. 103 are enclosed. Both shippers are signed off by Lt. Rice. 25X1

Three (3) Slitters

These "three (3) slitters" developed during fabrication into:

1. Three (3) each "Three Strand Separators"
- and, 2. Three (3) each "70mm Trimmers."

One set of a separator and a trimmer were shipped to Westover. Three (3) copies of a DD-250 signed off by Col. Brown are enclosed.

Three (3) copies of a second DD-250, our Shipper 64-XD-24, are enclosed to pick up accountability for the remaining two sets on PO-1800.

Task VII

Five (5) sets - Glass (50 pieces) for Type III windows

Three (3) copies each of our shipping documents dated 6 July, 30 July, and 6 August 1962 are enclosed. All of these are signed off by John Keane and document shipment of 53 each total windows. The 30 July shipper states delivery on Task VII is complete with that shipment.

As I said at the beginning, these documents are of rather mixed character, but they do prove deliveries. And, as I understand it, this is what you want.

Yours very truly,

DTA
